

PIOTR PŁACHTA

SOFTWARE ENGINEER / PROJECT MANAGER

PROFILE

I am a 32-year-old professional with several years of experience in the sales and IT industry, consistently achieving high performance results. My above-average interpersonal and analytical skills have enabled me to excel as both a project manager and a team leader. I seek to leverage my strong organizational, IT, and communication skills to take on new challenges in project management or software development roles. In my free time, I am learning machine learning and exploring its applications in the tech industry.

EXPERIENCE

Project manager

09.2023 – Present
Notel Ltd., Warsaw

I manage multiple projects within a telecommunications company, overseeing technical support and leading a team of engineers. I work to optimize existing solutions and serve as the key liaison between the sales and tech teams, ensuring smooth communication and alignment on project goals.

Sales and Marketing Specialist

03.2022 – 12.2022
Rotho, Koszalin

Managing international entities, completing the sales cycle, coordinating between departments. Upon joining the team, I implemented several improvements and optimized many processes within the company. I created tools (and documentation) using MS Excel, Visual Basic, MS Access, MS BI. Additionally, I can code in PowerShell and proficiently use Linux systems.

Fundraiser

06.2019 – 03.2020
Shelter Scotland, Glasgow

I participated in fundraising for charitable causes. Working in the door-to-door system, my task was to raise awareness among citizens about issues related to their place of residence and aid in the fight against homelessness.

Team Leader

06.2018 – 04.2019
Irish Red Cross, Dublin

As a team leader, I was responsible for organizing charity fundraising events and coordinating the activities of several groups of fundraisers and volunteers. I was responsible for the recruitment and training of new employees.

01.2017 – 06.2018; 01.2016 – 09.2017
Junior front-end developer, freelancer **RadiArt; Selesto, Dublin**

I collaborated with a team of experienced professionals in an Agile work environment. I created reusable code, responsive website components, and solved user interface problems
